WELCOME

It has been several years since we first opened our doors for business. We have learned a lot about our customer needs, expectations and loyalty. We greatly appreciate all of the on-going support, and the recent customers that have turned to us for their gobo needs. Our business has grown and we hold a strong position in the market. Our staff is dedicated, and our commitment to customer service and top quality products remains unchanged. Our relationship with our Swedish supplier Beacon AB has flourished and has brought many technology changes that have benefited you as the customer and us as the manufacturer.

We are pleased to offer you our latest catalog. It is filled with inspirational patterns from our creative art department and Beacon AB. Our digital content series has expanded to fulfill the growing needs of the digital projection market. InLight Gobos has introduced our Wedding gobos section that allows customers to design a custom gobo specifically for their special day. We are always trying to conceive new ideas to serve our customers better. If you have any suggestions or comments, please let us know. We are here to help.

Sincerely,

A handwritten signature in cursive script that reads "Rick Hutton".

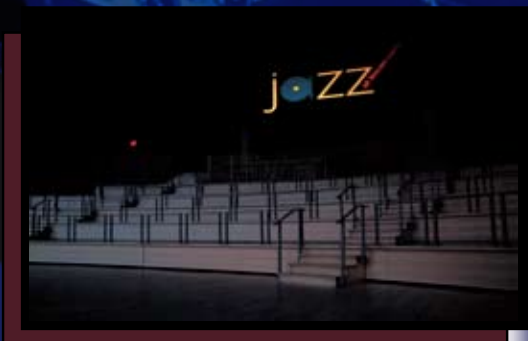

Rick Hutton
Founder and President

Unlimited Applications

Let us put your image "InLight"

The Full Color Photo Realistic and greyscale gobos, produced at InLight Gobos open the doors to a wide variety of applications well suited for gobo projection. Listed below are just a few possibilities.

Applications

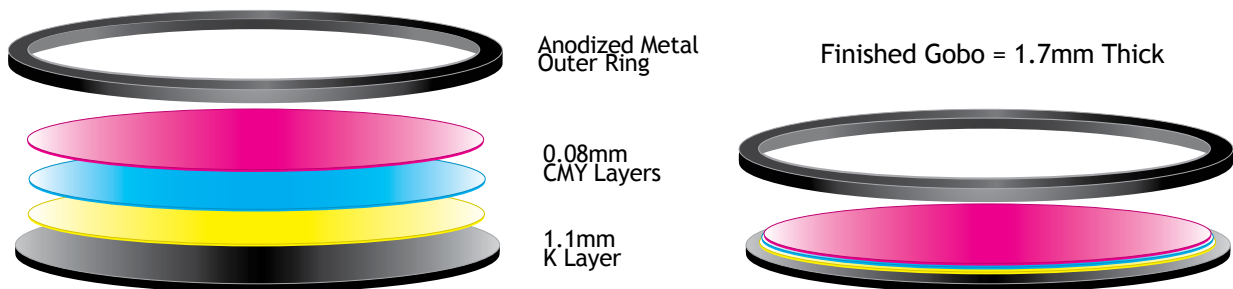

Our Process

INLIGHT GOBOS PROCESS is licensed under a patented technology developed by Beacon AB, of Sweden. This patent along with our own technologies allows us to manufacture a laminated full color dichroic gobo that is less than 1.7mm thick when completed. Our CMY dichroic color layers are each only 0.08mm thick. This gives us a huge advantage over our competitors. WHY?

OUR ultra-thin lamination allows all the layers to effectively be in the same focal plane in the projector. The results are a focused non distorted image when projected. Typically other color gobos are made from separate layers of dichroic glass up to 1mm thick each. This essentially places each layer in different focal plane causing distortion or a fuzzy focus in the projection. With our technology, that problem disappears. InLight Gobos utilizes current state of the art processes and techniques in manufacturing our gobos. Unlike most other gobo manufacturers, the entire process is carried out in-house.

WE work directly with you from start to finish. We take digital art and make it "process ready" From that, we transfer the image to our glass layers. The glass is then processed to remove the unwanted material and form the respective image in each layer. The glass layers are then cleaned and inspected under a microscope for any defects. Upon approval, the layers are then aligned and secured in a black aluminum ring, forming a full color gobo. The completed gobo is then inspected again for color matching and reproduction accuracy.

Please Note: InLight Gobos can reproduce virtually any color within CMYK color space. However, due to other variables in projection i.e.: your projector, light source used and age of source, atmospheric conditions and the projection surface, we cannot guarantee the exact match of your colors in a projection. If you have specific needs, please let us know when placing your order.

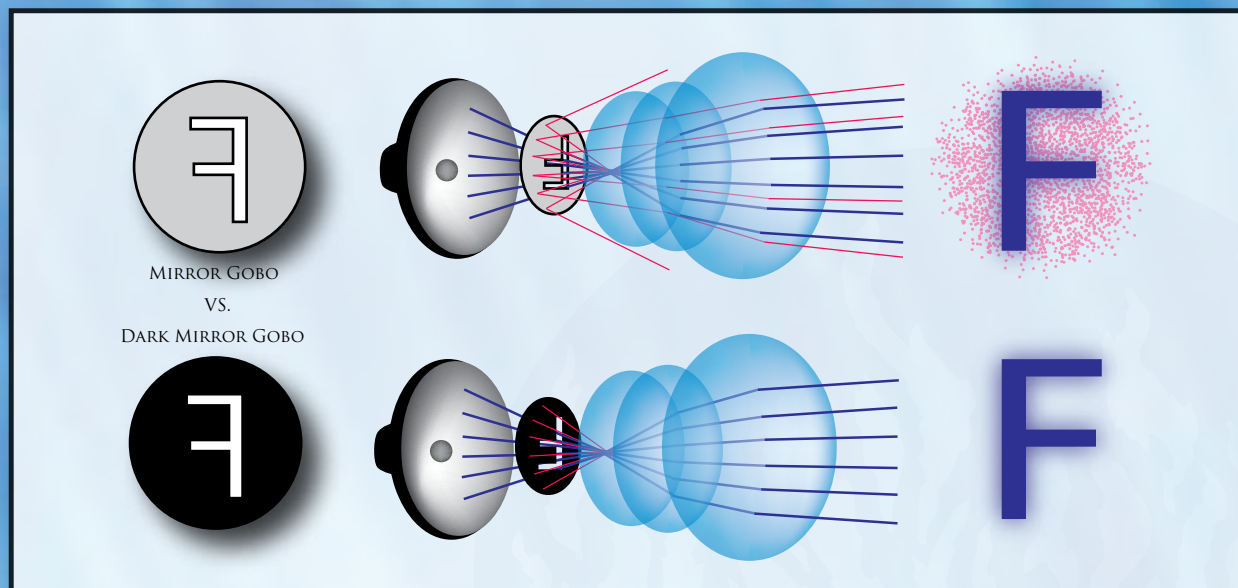

Black Line

AS A STANDARD: INLIGHT GOBOS manufactures all of our gobos with an Enhanced Dark Mirror coating and a protective outer black aluminum ring for a more robust product. All of this with NO extra cost to the customer. The Beacon Black-Line has a Enhanced Dark Mirror optical coating that is on the underside of the reflective mirror coating. When the gobo is installed in the luminaire, this black side (dark mirror) is placed in the projector facing the projection lens and acts as a light absorber.

HOW does this benefit the customer? When light passes through the gobo and enters the projection lens, some portion of the

light is reflected off the lens surface back onto the gobo. With a standard mirror gobo that reflects, light will bounce off of the gobo and back into the lens system. This will show up as a ghost image, or halo, around the projection. With the Dark Mirror, the reflective light is absorbed, and greatly reduces the halo around the projected image, this results in a higher contrast projection. (See Ray trace)

WE are constantly working to improve our gobo manufacturing technology. The ultra-thin dichroic color layers and the Black-Line combination make for a robust product. This combination is our standard, used on custom and catalog gobos.

These images depict a typical optical ray trace, showing the suppression of reflections with our dark mirror glass gobo, vs. mirror glass gobos.

ADDITIONAL SERVICES

LASER RING ENGRAVING

InLight Gobos offers a convenient service for permanent gobo identification. Our laser engraving process allows us to customize the protective metal ring (included with your catalog or custom gobo) with personalized information. You may add company names, part numbers, stock numbers or most any other information you require. This service is also perfect for marking gobos to match luminaire positions on your lighting plot.

ARTWORK CREATION SERVICE

So you don't have an in-house graphics person? InLight Gobos can also help you with Artwork Creations. Our talented art department is available to help you with your art or to create it for you.

GRAPHICS LAB

From simple black & white to detailed full color images, InLight Gobos is here to help!

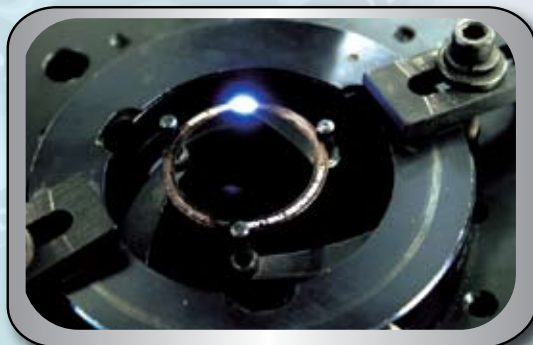

OEM GOBO MANUFACTURING

InLight Gobos also offers contract manufacturing of glass gobos to conventional and automated luminaire manufacturers.

OEM
GOBO MANUFACTURING

Volume discounts are available upon request.

LASER RING ENGRAVING

This service is available for any catalog or custom InLight Gobos product. For an additional Set-Up charge we can also engrave most other manufacturer's gobo products that use a metal ring.

A great resource for rental houses, lighting design firms, sales groups, large productions and much more...

Rent-A-Gobo™

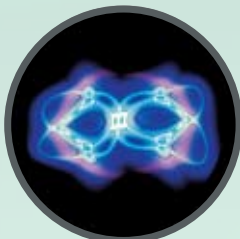

SHORT TERM projects

or one-offs with a tight budget?

Do you want to add the dramatic effect of full color and greyscale gobos to your projects without the cost of purchasing?

InLight Gobos has the solution for you. We are offering a select set of our most popular Color and Greyscale catalog gobos for rental. That's right! Our RENT-A-GOBO™ program. We listen to our customers' needs and one thing that constantly comes up is that they would love to utilize state of the art gobos but the budget does not allow for the cost of purchasing them. We want to help. We have selected our most popular catalog images and manufactured gobos using our standard Black-Line process and have them available for immediate delivery to your show site. You can save thousands off of your short run production and still have the pizzazz of a high end production.

009 CLOUDS

FOR the fourth consecutive year Beacon AB was chosen to create all digital content for the spectacular visual scenery at the Eurovision Song Contest.

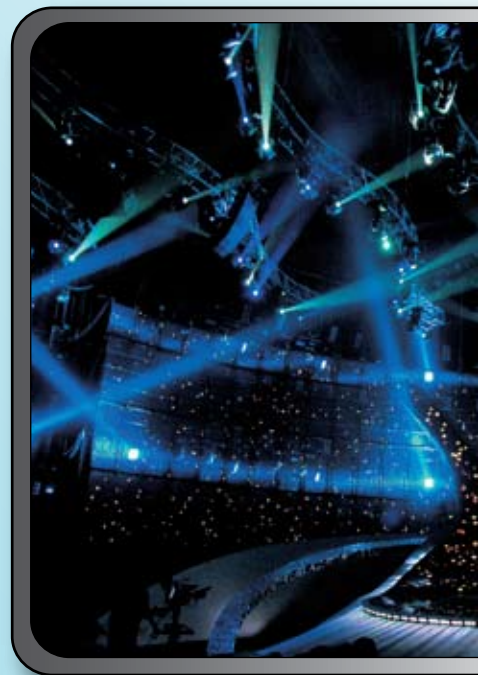

ALL DIGIGOBOS® were provided by Beacon and most of them were designed and produced on location.

INLIGHT GOBOS strives to stay on the leading edge of image projection technologies.

We are pleased to be the first and only U.S. gobo manufacturer to offer the next generation of gobo projection content....

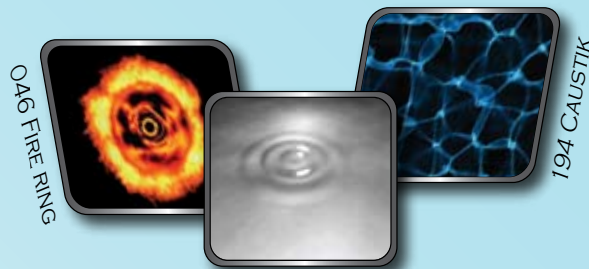

DIGIGOBOS®.

ROYALTY FREE
Digital Video Loops from Beacon AB. The Beacon DigiGobos® are a series of video clips in standard and HD resolutions, designed for the use in Catalyst®, Maxedia, Virtuoso® EX-1, RADLite, Green Hippo and other digital media servers on the market.

124 RIMDANCE

BEACON DIGIGOBOS® can be incorporated in derivative works such as live performances, film, video, broadcast, advertisements, web sites and presentations.

080 DRIPS

Eurovision Song Contest - Digital Content Provided by Beacon AB

DIGIGOBOS®

BEACON DIGIGOBOS® are supplied on DVD disks and are adapted to use with normal DVD players. These disks have 10 royalty-free video clips, both have separate loops and single loops with dissolves between each clip. Because of demand, all the series are now available in a collection of 10 DVD's in a box set. The series 1-4 contains 20 video clips per disc, and the series 5-forward have 10 clips each.

There are over 21 of the Standard Series discs available and the number keeps growing. All Standard Series DigiGobo® clips come in five formats: PhotoJPEG, M-JPEG, AVI, MPEG-1 and MPEG-2 (m2v).

HIGH DEFINITION IS HERE!

Series 1-6 and growing. All HD Series are (1920 x 1080/p) at 25fps Photo-JPEG (best quality and suitable for content editing). All of the Series and the newest clips are available for preview at www.InLightGobos.com or www.digigobos.com.

Along with using your DigiGobos®, InLight Gobos can manufacture matching static patterns for use in your automated projectors along with the digital projectors.

Custom and on-site programming also available. Please give us a call to discuss your needs.

digital content

THE PATTERNS YOU LOVE, ON THE GLASS YOU TRUST.

GAM patterns on Glass at InLight Gobos' catalog price

and no set-up charge. Just think, amazing GAM patterns on glass that will last for years instead of hours! Now you can have the best of both worlds at an affordable price. Use the GAM patterns you love in your high powered intelligent lights or for long term installations. The patterns you love on glass you trust. GAM on Glass™, **ONLY** at InLight Gobos.

To view GAM's patterns:

Simply follow this link to GAM's patterns <http://www.gamonline.com/index.php>. Contact us and give us the pattern name and number, the size you need and quantities. Also specify if you want the original "holding bars" or "tabs" included or deleted from the glass pattern.

Wedding GOBOS

Say "I do"

In a way that reflects the true you

At InLight Gobos we are always looking for ways to satisfy our customers' needs. Due to the increasing demand of gobos for use at weddings, InLight is proud to introduce its Wedding Gobo program. **It is simple. We want to help you create the wedding of your dreams because you deserve the very best.**

Just visit our web site at www.InLightGobos.com

- Select a font from our exclusive selection.
- Select a layout from our select designs.
- Add an image that complements your wedding theme.
- Supply us with your wedding details.
- Supply the order info.

We will send you a proof of how your gobo will look. Your personalized gobo will make your wedding a memorable event. For your wedding, settle for nothing but the best. It will be a memory to last a lifetime.

Your special day is special for us too!

Wedding Gobos

CUSTOM GOBOS... OUR SPECIALTY

MUSIC CITY HOLIDAY SPECTACULAR / PRODUCED BY
CORPORATE MAGIC. LIGHTING DESIGN BY HAN HENZE

Turn your custom artwork into stunning gobos for use in intelligent or conventional lighting instruments. Full color photographs, greyscale or black & white images, corporate logos...virtually any image you like can be transformed into a gobo. We also supply custom METAL gobos.

Our staff of dedicated gobo professionals will see that all of your custom needs are met no matter if your need is for one or thousands. The same care is placed into each gobo produced.

'KINDLE COMMUNICATIONS'
LIGHTING DESIGN BY LIGHTSWITCH

*Turn your Custom Artwork
into Stunning Gobos*

We manufacture a variety of sizes to fit most popular luminaries. Refer to our gobo sizing chart for assistance in determining the proper size for your projector. If you need assistance or have a question, give us a call. We are always glad to help.

LIGHTING DESIGN BY LIGHTSWITCH

As with our catalog gobos, our pricing is set to be simple. A one-time setup charge is incurred for each new art submitted. Duplicate gobos can be reproduced from previous orders at any time without additional fees. Please contact us for more information and pricing.

PLACING YOUR ORDER

We will need to know the following information before your order can be quoted:

1. Customer name and contact information.
2. The lighting instrument that will be projecting the gobo.
3. Quantity needed and gobo size (in millimeters).
4. Whether you intend to project the image on to a surface from the front or on to a screen from behind.
5. Is the background of the image clear or black?
6. When you need the order shipped.

When placing orders, please e-mail the above information and attached artwork to **sales@InLightGobos.com**. A quotation and proof will be generated and returned to you via e-mail for review. If you approve the information, you must sign the quotation and fax or e-mail it back to InLight Gobos. Once we receive the signed quote, please allow a lead-time of five working days before the order ships. For orders requiring a quicker turn-around time, please contact our Sales department. Additional charges may apply. Call 469-916-2910 or e-mail us at **sales@InLightGobos.com** to confirm delivery times.

PREPARING YOUR ARTWORK

Keep in mind that the image quality and detail of the gobo is determined by the quality of the original artwork. We accept a variety of file formats. We use the latest versions of Adobe Illustrator and Adobe Photoshop to process the artwork. Our four-color process, known as CMYK, is similar to the CMYK printing process. We work at a resolution of 3600 dpi. All artwork should be converted to CMYK format, and the original art saved at a high resolution.

InLight Gobos wants to provide you with the highest quality gobos possible. Here are some tips for you to help us succeed in our mission.

When preparing artwork please use the following formats:

The preferred file format is Adobe Illustrator (.ai) file. This vector-based artwork creates the best gobos, and is best suited for text and logos. This format allows us to provide a sharp, crisp image at the highest possible resolution. Vector artwork should be created and saved as an Adobe Illustrator compatible file containing all layers. Please note that fonts used in vector artwork **MUST** be converted to outlines to avoid missing font issues.

If vector artwork is unavailable, you may submit your artwork as a raster image. Raster artwork is best suited for reproducing photographic images, but can be used for text or logo images. Raster artwork must be sent as an Adobe Photoshop compatible file in the following formats: .psd, .eps, .tif, .pdf, .png or .bmp file.

JPG and GIF formats are accepted, but the resolution and compression of the file may reduce the final image quality and additional hourly artwork fees will apply.

PLEASE NOTE: Artwork with low resolution will project fuzzy and/or distorted and will not give the best appearance. Most web images are created at 72 dpi. Please do not try to resize an image taken from the Web from 72 dpi to a higher resolution. To receive the highest quality image, we require artwork to be saved at a minimum resolution of 600 dpi with an image size of at least 5 x 5 inches (127 x 127 mm).

Artwork received at lower resolutions will incur an additional (hourly) artwork fee. However, the quality and detail of the gobo will still be determined by the original quality of the artwork.

We also accept hard copies of artwork; such as photographs, slicks, or prints. Faxed images are accepted, but usually do not reproduce well. Please submit a reasonably sized, clean copy of your artwork. Additional (hourly) artwork fees may apply for poor quality artwork.

SUBMITTING YOUR ARTWORK

To reduce the file size of larger images, please use a file compression utility such as WinZip, PKZip or Stuffit rather than graphic compression (e.g.: highly compressed jpeg files).

Files can be submitted via e-mail to sales@InLightGobos.com or uploaded to our FTP server. Please contact us for information regarding sending artwork via FTP. We also accept the following mediums: Zip Disk, CD, DVD, Compact Flash, Memory Stick, and paper copies. Artwork may be sent to:

**INLIGHT GOBOS ATTN: ART DEPT.
2348 IRVING BOULEVARD
DALLAS, TX 75207**

To confirm your order, please contact our sales department at 469.916.2910.

PAYMENT

All orders must be paid before being shipped. We accept company checks and credit cards. COD orders are available upon request. Terms are available to qualified organizations. Please contact us for more information.

SHIPPING

We use FedEx Overnight as our preferred shipping carrier. Delivery prices range depending on the destination. Clients may provide their shipping account number to bill shipping directly to them. Shipping is in addition to the item costs

Let us put your image “InLight”.
