

SOFTWARE RELEASE NOTES

Product: Mbox Director
Manufacturer: PRG
Subject: Software Version 5.4.1
Bulletin No: MBX-074
Date: November 13, 2025

INTRODUCTION

Mbox Director Software Version 5.4.1

We are pleased to announce that software version 5.4.1 is now available for the Mbox Director application. Director version 5.4.1 addresses several critical issues in the Mbox Director application.

Compatibility with Apple Silicon Processors - M1/M2/M3/M4 - and macOS versions

Mbox Director is a universal application and runs natively on both Apple Silicon and Intel computers. Director requires at least macOS 10.14.6 and is compatible with all versions of macOS up to and including macOS 15 Sequoia. The use of macOS 16 Sequoia is still discouraged at this time due to bugs in the OS. If you must use Sequoia and have issues using Mbox Director, please contact MboxSupport@prg.com for assistance.

IMPORTANT!! Future versions of Mbox Director will eliminate support for older versions of macOS. Director 5.4.x will be the last version with support for macOS Mojave (10.14) and possibly Catalina (10.15).

Mbox, PRG, and your Personal Data

Please refer to the release notes for Mbox software version 5.0.2 (MBX-065) for information regarding PRG's use of your personal data. Please contact MboxSupport@prg.com if you have any questions.

Corrected Issues

- + Fix profile issue that caused a newly-patched (using Director 5.4) instance of Mbox Studio not to work correctly and which affected all layers of that server.
- + Fix issue in Tahoe where the use of up/down arrow keys when editing values in the Scene List could cause values to disappear.
- + Fix occluded text/image that appears when an Mbox server is in Monitor Only mode.
- + Fix alert shown when MTC is the selected timecode source but MIDI is not enabled.
- + Improve tooltip warning language when Director can't receive replies from Mbox.

Updated Features

- + The concept of DHCP "quarantine" has been eliminated and Director will no longer flag instances of Mbox on DHCP networks as needing special permission to connect.
- + Revised application icon compatible with macOS 26 Tahoe's new icon shape.
